

Film Studies Summer Work 2026

To prepare for your A Level Film Studies course, please complete the task below and **bring it with you for our first lesson**. Don't worry about using technical language (we'll learn that together!).

Key Scene Analysis: Choose **one scene** from a film you enjoy. It could be from something classic, modern, or even animated. Answer the following questions:

- What stands out about the way the scene is filmed (camera movement, lighting, colours)?
- What do the costumes, setting, or props tell us about the characters or story?
- What mood or emotion is created through editing or music?

Your answer can be in any format you like: a written-up analysis, a poster, a set of slides. Screenshots can be really helpful!
